Looking for ways to enrich your students' educational experience? Let One Heart Music help nurture the whole child!

ONE HEART MUSIC is a hands-on early childhood music program designed for families with young children. Parents, teachers and children will learn that making music is *fun!* Join us to sing and make music in a playful and *nurturing* environment. Enjoy an **energetic** and **playful musical celebration** of songs, chants, instruments, creative movement and finger plays. George engages students with his energetic style, and is well versed in the language of "silly." He helps children develop an internal feel for *rhythms, tones, and tempo*-- and makes every class a party! Learning music at an early age supports not just music learning, but ALL learning and provides a lifetime of emotional, social & intellectual benefits. **One Heart Music inspires children** to have fun with music education while making a *lifelong musical connection* with their parent, caregiver & teachers.
